Atherectomy system

## Phoenix guidewire

### Technical specifications

Part Number	Type	Diameter	Length	Tip	Style
PG14300LF	Silicone coated nitinol core	.014"	300 cm	Floppy	Light support

### Indications

The Phoenix guidewire family is designed for percutaneous entry into the peripheral vascular system as an intravascular device. It gently negotiates the vascular system while maintaining enough strength and rigidity to enable a catheter to be directed over the guidewire with ease.

### Contraindications

This device is not intended for use in the coronary or neurovascular arteries.

*The Phoenix guidewire is compatible with the Phoenix Atherectomy System.*
