

Flexible solutions for single and multi-patient care

Hospital-acquired infections are costly occurrences that can negatively impact patient care in the process. But with increasing pressure and strain on organizational finances, using disposable supplies for every patient just isn't feasible. Fortunately, our broad portfolio of Philips single and multi-patient noninvasive blood pressure supplies can help you balance the needs of your patients – with limited impact on your budget. And with adapters that make it possible to connect to most available monitors, you can rely on Philips for all of your NIBP needs.

Convenient and affordable

Philips Single Care cuffs offer Philips quality and validation at economical prices. Made of soft, comfortable fabric, each cuff features a patient identification section for single patient use. These cuffs come in a full range of AHA-compatible sizes with color-coding and exterior size markings.

Durable and long-lasting

Philips multi-patient disposable cuffs are an ideal choice for areas where risk of cross-contamination is high, or where cuffs are subject to heavy soiling, such as the OR and ER. When cleaned according to hospital protocols, these cuffs can be reused, extending the longevity of the cuff and reducing the impact on your budget. Available in a full range of AHA-compatible sizes, you can count on the durability of these cuffs.

PHILIPS

Gentle on patients and the environment

A soft, felt-like cover brings exceptional comfort to patients while EVA materials help reduce the environmental footprint upon disposal of our Gentle Care disposable cuffs. These cuffs come with an integrated bladder, making them ideal for use in the OR, ER, cath lab, isolation, or other applications that call for single patient use NIBP cuffs. Gentle Care cuffs feature color-coding and exterior size markings for ease of use, and come in a full range of AHA-compatible adult, pediatric, and XL sizes.
