

PHILIPS

dStream Flex S

MR coils

Flexibility for **multiple applications**

dS Flex S coil for 1.5T and 3.0T systems with dStream

Key benefits

- Allows positioning close to anatomy to increase SNR
 - Open, non-rigid design offers imaging solutions for challenging cases
 - Delivers high resolution and extended coverage in combination with FlexCoverage Posterior coil
-

An integrated coil solution for general-purpose imaging. It includes two small flexible general-purpose coils. Combined with the FlexCoverage Posterior coil, you can obtain 10 cm coverage with up to 4 channels.

The shape and size of the flexible coil elements support a wide variety of applications, including imaging of small anatomies. The coil can be used to locally enhance resolution of images acquired over a larger field of view (FOV), for example in pediatric applications.

dStream Flex S coil

Coverage	10 cm
Maximum number of channels	4
Main applications	Elbows Wrist Ankle Inner ear Pediatrics
Coil solution type	Integrated
Data sampling	dStream digital broadband
Coil connection	dStream Interface
SENSE parallel imaging	dS SENSE enhanced parallel imaging performance

Coronal PDw TSE - Elbow
Resolution: 0.4 x 0.5 x 3.0 mm
Scan time: 3:58 min
Ingenia 1.5T

Axial T2w TSE - Elbow
Resolution: 0.5 x 0.5 x 3.0 mm
Scan time: 3:00 min
Ingenia 1.5T
