

# Value beyond measure

Philips labor and delivery supplies

**PHILIPS**

# Why Philips labor and delivery supplies?

## Quality care

When all is said and done, the only reason to choose one brand of supplies over another is to improve the quality of care you deliver to mothers and their babies before, during, and after birth.

Philips supplies offer:

- **Simplicity.** Every supply we make is easy to use, giving you more time to care for mothers and their babies.
- **Safety.** Our new fetal spiral electrode features a protection tab that keeps the spiral tip inside during insertion.
- **Accuracy.** Our monitors and supplies work together to deliver accurate measurements you can trust.
- **Expertise.** Enjoy easy access to technical and clinical monitoring expertise — all just a phone call away.

## Cost-effective care

Philips helps you manage and control the cost of labor and delivery care by making it easy to buy, use, and maintain high-quality supplies.

- **Convenience.** It's faster and easier to buy monitoring equipment and supplies from a single source.
- **Efficiency.** Improve the efficiency of service, maintenance, and user training.
- **Support.** Get all the technical, clinical, and product support you need with a single phone call.

## Reliable care

Philips labor and delivery supplies deliver a total, integrated solution from a single vendor with a proven track record for accuracy and reliability in fetal and maternal monitoring.

- **Compatibility.** Philips supplies complement Philips monitors, resulting in the highest quality measurements.
- **Accuracy.** Philips world-class algorithms and high-quality supplies ensure the accuracy of our monitoring systems.
- **Knowledge.** The technical, product, and clinical expertise your staff needs is available from a single source.

## Fetal monitoring

### Non-invasive

#### Fetal monitoring belts

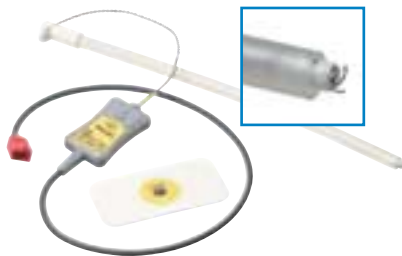

Philips broad range of soft, reusable, and disposable fetal monitoring belts includes a new Latex-free reusable model that's both water-resistant and comfortable. Available in pre-cut sizes and rolls.

#### Fetal monitoring paper

If you want excellent diagnostic quality and the ability to archive records long-term, you need high-quality paper. Philips fetal monitoring paper not only stands up to the rigors of labor and delivery, it maximizes the life of your Philips recorders. Our papers are mechanically and chemically compatible and provide quality traces that you depend on.

### Invasive

#### Fetal spiral electrodes

Our accurate and reliable fetal scalp electrodes are easy to open, easy to insert, and easy to attach — for maximum fetal comfort. Compatible with all Philips, Hewlett-Packard, and Agilent fetal monitors. They require a reusable adapter cable and a disposable fetal adhesive pad electrode.

#### Maternal SpO<sub>2</sub> sensors

Our SpO<sub>2</sub> reusable sensors deliver instant alignment, lasting performance, accuracy, and unequalled comfort to mothers during labor and delivery. Plus, they are guaranteed for one year and last up to 18 months.

#### Maternal NIBP cuffs

Philips non-invasive blood pressure cuffs simplify life for clinicians, while offering moms a level of comfort that's second to none. And features like color-coded sizes, extra long cuffs, and antimicrobial coatings make this family of cuffs the right choice for labor and delivery departments.

## Maternal monitoring

#### Maternal Koala™ IUP catheters

Our disposable intrauterine sensor-tip pressure catheter is the safe, accurate way to measure IUP during contractions. Its small, soft tip is designed to avoid perforation or tissue damage. And there's no electrical risk for the mother or child.
