Cardiac resuscitation

HeartStart OnSite

Products and services, maximizing defibrillator performance

Philips HeartStart OnSite Defibrillator supplies and accessories
Carry cases

There are three carry cases available for the HeartStart OnSite Defibrillator: the Standard Carry Case, the Slim Carry Case and the Hard-shell Waterproof Case. The Standard and Slim Cases are constructed with semi-rigid materials and covered in durable red Cordura.® A window pocket inside both cases, the Standard and Slim, holds the OnSite Quick Reference Guide.

**Standard Carry Case**
Item # M5075A
In addition to the OnSite Defibrillator, the Standard Carry Case can accommodate one spare pads cartridge and a spare battery. It also comes equipped with a pair of paramedic scissors.

**Slim Carry Case**
Item # M5076A
The Slim Carry Case holds the OnSite Defibrillator and a pair of paramedic scissors.

**Hard-Shell Carry Case**
Item # YC
Our waterproof carry case made of hard-shell plastic is suited for more rigorous use, particularly in wet outdoor settings. It can also accommodate a spare battery, spare pads cartridge, and the contents of the Fast Response Kit.
Signage and wall mounting solutions

Philips Wall Mount Bracket and specialized signage let you strategically place defibrillators for fast access and response and raise awareness of AED locations.

Wall Mount Bracket
Item # 989803170891
The Wall Mount Bracket is designed specifically for housing a Philips HeartStart defibrillator and its accessories. The defibrillator's carry case can be tethered to the Wall Mount Bracket with a breakaway Secure-Pull Seal (M3859A) to discourage tampering. A broken seal indicates that the defibrillator has been removed from the Wall Mount and accessories may need to be replenished. The Fast Response Kit (68-pchat) tucks neatly behind the Defibrillator Case.

Secure-Pull Seal
Item # M3859A
Secure plastic pull seal for attaching defibrillator case to wall mount or cabinet. Seal intended to deter theft and indicates tampering, yet is easy to “break away” for use during an emergency. Recommended for all customers purchasing wall mount brackets.

AED Awareness Placard
Item # 989803170901 (Red)
Item # 989803170911 (Green)
Raise awareness by putting an AED Awareness Placard above every AED located in a public area. Easy-to-understand graphics raise awareness of passers-by about how to use an AED in an emergency. Great for office settings, sports clubs, public facilities, school settings and more.

AED Wall Sign
Item # 989803170921 (Red)
Item # 989803170931 (Green)
An AED Wall Sign hanging above a Wall Mount Bracket or Defibrillator Cabinet gives even greater visibility to the defibrillator. Can be mounted three different ways to maximize visibility: T-mount, V-mount or Corner Mount.

AED Awareness Poster Pack
Item # 861476
Place these posters away from the AED, in break areas, copy rooms or locker rooms – anywhere that employees or members of the public can take a moment to raise their awareness about AEDs. Includes space for the AED coordinator to write in the location of the nearest AED. Pack of four posters. Available in English, Spanish, French, Japanese, and Italian.

AED Signage Bundle
Item #861478
A convenient bundle designed for AEDs already housed in a cabinet or bracket. The wall sign, awareness placard and 4 awareness posters included in this bundle increase the visibility of the AED and help to raise awareness of employees, members of the public and other passers-by.
Cabinets

To help mobilize an emergency medical response or deter AED theft, Philips offers three different wall cabinets. The basic cabinet has a simple audible alarm. Also available are two premium cabinets: a wall surface mounted cabinet and a semi-recessed cabinet that is inserted into a wall cut-out for a less obtrusive look.* The premium cabinets feature combination audible and flashing light alarms. They are made of sturdy heavy-gauge steel, and are large enough to accommodate additional medical supplies. You can also connect the premium cabinets’ alarms to your internal security system so that a more coordinated emergency response can be mobilized centrally.

* The Americans with Disabilities Act requires that objects not protrude more than 4” into foot traffic areas of open aisles and walkways unless the object’s bottom edge is no higher than 27” from the ground.
SMART Pads Cartridges

Adult SMART Pads Cartridge
Item # M5071A
HeartStart Adult SMART Pads are appropriate for cardiac arrest victims weighing 55 pounds (25 kg) or more.

Infant/Child SMART Pads Cartridge
Item # M5072A
Children under 8 years of age or weighing less than 55 pounds (25 kg), including infants, should be treated using HeartStart Infant/Child SMART Pads, if available. These pads instruct the defibrillator to provide voice instructions appropriate for a pediatric patient, and to reduce the energy of its shock from 150 to 50 Joules (J), a more appropriate dosage.1,2 The Infant/Child Pads cartridge is marked with an indication of patient weight and with a teddy bear icon for easy identification. Purchase of this product requires a prescription.

Additional accessories

Long-life Battery
Item # M5070A
The OnSite Defibrillator uses a disposable, lithium manganese dioxide, long-life battery with a five-year shelf life plus a (typical) four-year installed life. A spare battery should be stored with the defibrillator. Additional batteries should be purchased for defibrillators used frequently for training and/or demonstrations.

Fast Response Kit
Item # 68-PCHAT
The Fast Response Kit contains tools and supplies typically needed for patient care and personal protection: two pairs of hypoallergenic nitrile gloves, a pocket breathing mask, paramedic scissors, a chest hair razor, and a large extra-absorbent paper towel. These items are housed in a zippered pouch which attaches securely to the handle of the carry case.

Training tools

**Training Cartridges**
- **Item # M5073A** (Adult)
- **Item # M5074A** (Infant/Child)

To facilitate training on the OnSite Defibrillator, Adult and Infant/Child Training Pads Cartridges are available. These special purpose pads can be installed in the HeartStart OnSite and the HeartStart Trainer. When installed in the OnSite, they suspend the defibrillator’s ability to deliver a shock and activate its training mode, enabling the user to run any of eight emergency scenarios. Depending on which cartridge is used – Adult or Infant/Child – the defibrillator’s voice instructions, including cardiopulmonary resuscitation (CPR) coaching, will be appropriate for treating the simulated victim.

Each training pads cartridge consists of a removable clear protective lid with a handle, a resealable film cover, and a pair of reusable adhesive pads. It is packaged with a Pads Placement Guide (either Adult or Infant/Child) and illustrated instructions for installing the cartridge, using the Pads Placement Guide, and repackaging the cartridge after using it. A training pads cartridge can also be used on a manikin, connected with an external (M5089A) manikin adapter.

* Replacement pads are available for training cartridges: Adult, M5093A and Infant/Child, M5094A.

**HeartStart Trainer**
- **Item # M5085A**

For training many responders simultaneously, the Philips HeartStart Trainer is a flexible and economical solution. The HeartStart Trainer helps your responders learn to use the OnSite Defibrillator. With voice instructions matching those of the OnSite Defibrillator and eight preconfigured scenarios, the Trainer simulates how the defibrillator would operate during real-life situations the responders might encounter.

The HeartStart Trainer comes with a nylon carrying case, one reusable Adult Training Pads Cartridge (M5073A) and one External Manikin Adapter. Optional accessories include the External Manikin Adapter 10-pack (M5089A) for use on all manikins, the Adult Pad Placement Guide (M5090A), and the Infant/Child Training Pads Cartridge (M5074A).
Data management

Philips provides a broad range of tools to help you efficiently and effectively configure your HeartStart Defibrillators and then download, transmit, share, analyze, and report resuscitation data, so you and your medical director can fine tune your response to cardiac emergencies. Whether you manage a community public access program, a school AED program, a corporate emergency response team, an EMS system, or your hospital's resuscitation committee, the Event Review software suite has the tools you need to manage your defibrillator data.

**Data Messenger**

Item # PN 861451 Opt A01 - Single PC  
Opt A03 - Site License  
HeartStart Data Messenger helps you move defibrillator cases to where they need to be. Its ideal for fire departments and EMS organizations who want to download defibrillator cases from their AEDs and forward them on to a central data administrator or medical director for retrospective review on Event Review or Event Review Pro. You can configure it to operate automatically in the background. Alternatively, you can configure it to be an easy-to-use wizard that guides you step by step in downloading, viewing and forwarding cases. Runs on a PC or Smartphone.

**HeartStart Configure**

Item #861487  
HeartStart Configure enables you to configure your HeartStart AED from a computer, reflecting your medical director's preferences. In a few clicks from your computer, the current defibrillator configuration can be retrieved, reset to the default values, or revised according to your preferences. To efficiently manage configuration for your early defibrillation program, you can save the configuration settings to a file. This makes it easy to re-use the same configuration on all AEDs and maintain a record of allowable settings. Your medical director can individualize the settings according to your program's preferred response protocol. Only authorized personnel under the oversight of a medical professional should make changes to defibrillator default values.

**Event Review Pro**

Item #861431 Opt A01 – Single PC  
Opt A03 – Upgrade to Site License  
Event Review Pro is our comprehensive case management tool for the most demanding data managers and medical directors, with even more detailed data entry screens to record every aspect of the response, including detailed response times, interventions, and patient observations. In addition to the individual case reports, you get Utstein reporting and graphical summaries of your system’s overall response times to help you manage your service levels more efficiently.

* Changes to default values should be done only by authorized personnel under the oversight of a medical professional. Purchase of this product requires a prescription.
HeartStart AED Services

We provide management tools and resources to support the needs of your AED program. Whatever your needs, we will work with you to find the services that are right for your situation. We can help you seamlessly manage important components of your AED program, including:

- SMART Track online program management
- Medical direction
- Training
- Maintenance
- Post-event support
- Customer service

* Where available.

Philips can help you implement a successful AED program at a single site or at multiple sites globally.
