

Philips Lumea Essential IPL Hair removal device

Philips Lumea Essential works wonders to prevent the reappearance of hair on face and body. Gentle pulses of light, applied regularly, keep skin silky-smooth every day. The product is free of hazardous substances polyvinylchloride and phthalates and has a brominated flame retardants free housing.

Our eco passport

Philips wants to make the world healthier and more sustainable. To make this a reality, we have to keep thinking differently; pushing the boundaries of what is currently believed possible. We continuously innovate and deliver products and technologies that are positive for people and the environment. At Philips we call this Green Innovation.

We know this is important to you too. So we have developed an eco passport which explains the environmental performance of our products in the six Philips Green Focal Areas, developed through our eco design process since 1994, enabling you to make conscious, informed decisions. An eco passport will explain the Green Focal Areas considered and applied in the specific product.
