## DreamWear<sup>®</sup>

Nasal mask with mask cushion underneath the nose

The innovative design\* of DreamWear offers you the freedom and comfort to sleep in the way you would like.

### Freedom of movement

- For a more natural sleep
- Soft, flexible mask frame
- Innovative mask design for more freedom in sleep therapy
- More comfort with DreamWear

### No red marks on the bridge of the nose

- Cushion under the nose
- Slim headgear design

### Unobstructed view

- Hose connection on the head
- Read without disabilities or watch TV

# Highlights

## Cushion under the nose

The mask cushion lies gently under the nose, which causes no pressure points on the bridge of the nose and prevents unpleasant skin irritations on the nostrils.

## A more natural sleep

DreamWear combines the advantages of minimal contact masks and nasal masks, provides high comfort and can contribute to successful sleep therapy.

## Hose connection on the head

The exhaled air is not discharged directly at the nose, but at the top of the head. This hose positioning allows more freedom of movement during sleep. Users say they no longer need to sleep in a specific position with DreamWear, but have more freedom. \*

## Read or watch TV

Thanks to the open design, DreamWear offers a very large field of view, so you can easily wear glasses and read, watch TV or use a tablet PC in bed before going to sleep.

## Soft, flexible mask frame

The flexible material, through which the air flows, gently rests on the skin, prevents pressure points and provides a comfortable fit.

## Innovative mask design

The innovative design\* of DreamWear prevents pressure sores and skin irritation on the nostrils and on the nose bridge, and allows the user, in addition to a clear field of view, more freedom of movement through the hose connection on the head.

## Slim headgear design

DreamWear unites comfort and aesthetics - the headgear is unobtrusive and sleek in color, making DreamWear as discrete and uninterrupted as possible.

## More comfort with DreamWear

Users said DreamWear was more comfortable to wear than their previously prescribed mask, as it is barely noticeable.

# Specifications

## Innovative design

**Comfort and performance:** Reduced skin irritation
